

Contain-A-Lock® Padlock Protector

The Contain-A-Lock® is a high-security, heavy-duty locking system designed to deter criminals and provide superior protection. Its patented lock retention system also ensures that your lock is held in place meaning you never have to worry about losing it.

With a neat finish, it is ideal for enhancing the security and appearance of containers, self-storage units, and rental spaces. Perfect for situations where standard container door handle security is insufficient, Contain-A-Lock® delivers robust and reliable protection for your valuable assets.

Specification & Features

- Constructed from heat treated 4mm steel for a cut-resistant and highly corrosion-resistant surface.
- Supplied with the professional-quality CISA 285/75 padlock.
- Slim design restricts access to the padlock, preventing tampering with tools.
- Corrosion-resistant and tamper-proof for long-lasting durability.
- Easy to use with no maintenance required.

Padlock protector shroud and lock; can be welded on and delivered "ready to go" or supplied separately with instructions for customer to weld on.
