

Container Lining

We offer an optional container internal lining to help maintain comfortable temperatures, minimise condensation, and improve heating and cooling efficiency—ideal for use as office spaces.

Our lining extends to the doors, providing full insulation while ensuring the cargo doors remain fully operational.

The standard lining includes timber stud work, with fire-resistant and fireproof options available upon request.

Specification & Features

- Professional finish
- 11mm thick OSB/3 boards used for maximum strength

OR

- 12mm MFC White Textured Melamine

Benefits & Uses

- Helps to prevent condensation
- Helps to control internal temperature
- Reduced noise
- Perfect to fix electrical installations
