

S Jones Containers StoragePro service swings into action for Anglesey Golf Course

Shipping container hire, sales and conversion specialist S Jones Containers has supplied 39 new storage containers to set up a brand-new storage facility at Anglesey Golf Course through its StoragePro service.

The new Rhosneigr Storage Cyf self storage site, located on Anglesey Golf Course in the heart of one of the region's busiest tourist areas, was devised to diversify and maximise revenue without impacting club members. From its picturesque location on the coast, Rhosneigr Storage Cyf is ideally placed to cater for those who return to Rhosneigr season after season, offering secure extra storage space for household items or commercial stock for local businesses. S Jones Containers provided 39 standard 20ft single trip shipping containers in dark green to complement the stunning surroundings of the golf course.

S Jones Containers supported Rhosneigr

Storage Cyf every step of the way through its StoragePro service, assisting with all the practical aspects of the initial site set up, from the placement of the units to on-site security arrangements. For example, the units were positioned to allow space for customers to drive right up to individual units to make loading and unloading easy.

Glen Wills, Head of Sales at S Jones Containers said: "This is a growing trend we're seeing across the self-storage sector. Customers including farmers, holiday park owners or, as in this case, golf clubs, are looking at ways to maximise the revenue of their land and self-storage facilities offer a great low maintenance way to do this. Our StoragePro service allows us to guide first time customers like Rhosneigr Storage Cyf, through the whole process beyond simply delivering the units as ordered, to make sure the site works efficiently and has room to expand its capacity to meet

demand as their business grows.”

The StoragePro service is tailored to support customers setting up a self-storage facility by offering site consultancy services to match the right container mix with the requirements of the site, CAD site layouts to optimise layouts for accessibility and security, and providing projected revenue calculations. The team is also able to offer recommendations through its trusted suppliers of CCTV, lighting, security and other essential services.
